

Instructions

Please read the following instructions carefully before submitting assignment:

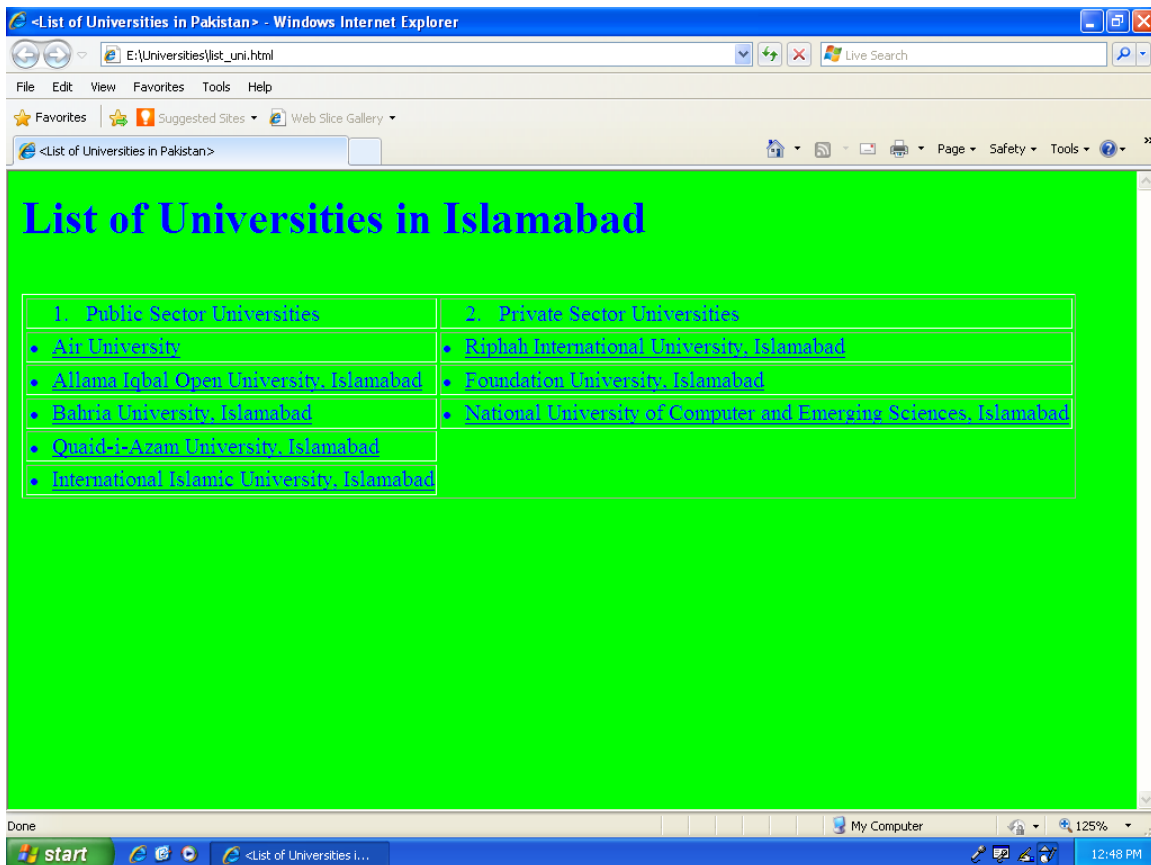

It should be clear that your assignment will not get any credit if:

- Assignment is submitted after due date.
- Submitted assignment does not open or file is corrupt.
- Assignment is copied.

Assignment

Question# 1 (3+7)

- a) Consider an office environment in which we have 10 stand alone computers, one printer and one scanner. Which topology is suitable for the given scenario? Support your answer with at least two reasons.
- b) Write an HTML program that creates a table containing a list of Universities in Islamabad using ordered and unordered lists. Set the background color to green. Each University name should be linked with its particular website. By clicking on the University name it must lead the user to the respective University website e.g. <http://www.au.edu.pk>
- A sample output will look like given below:

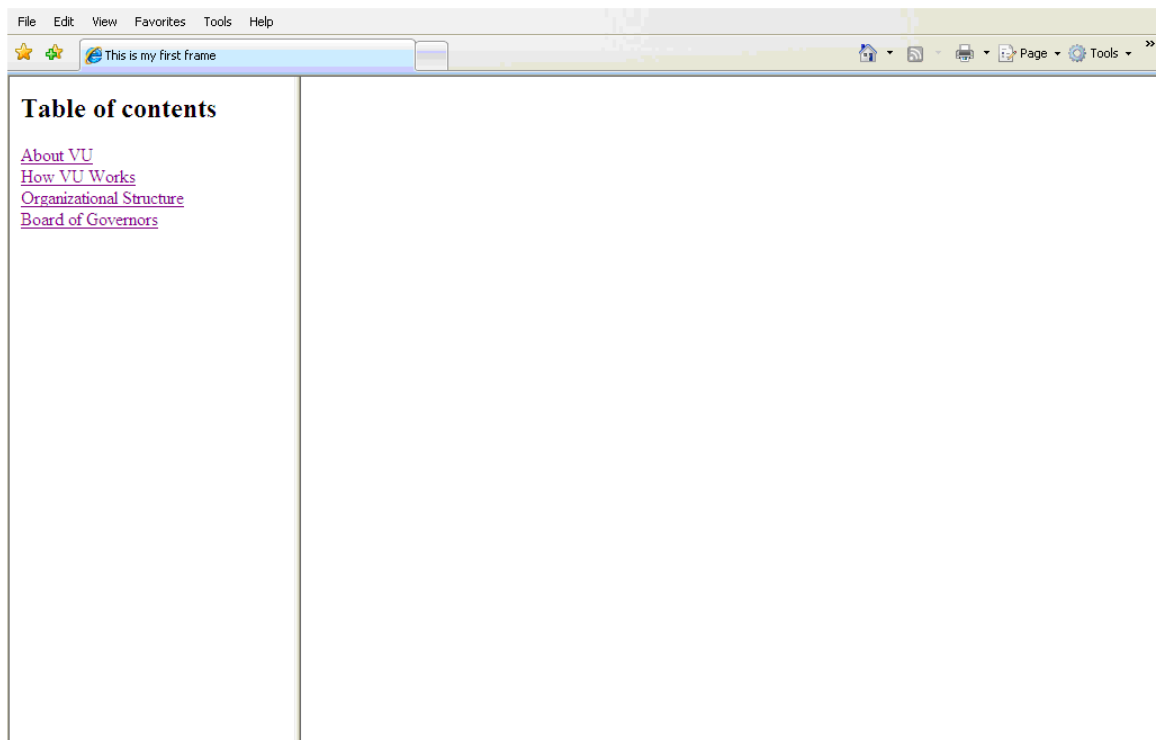

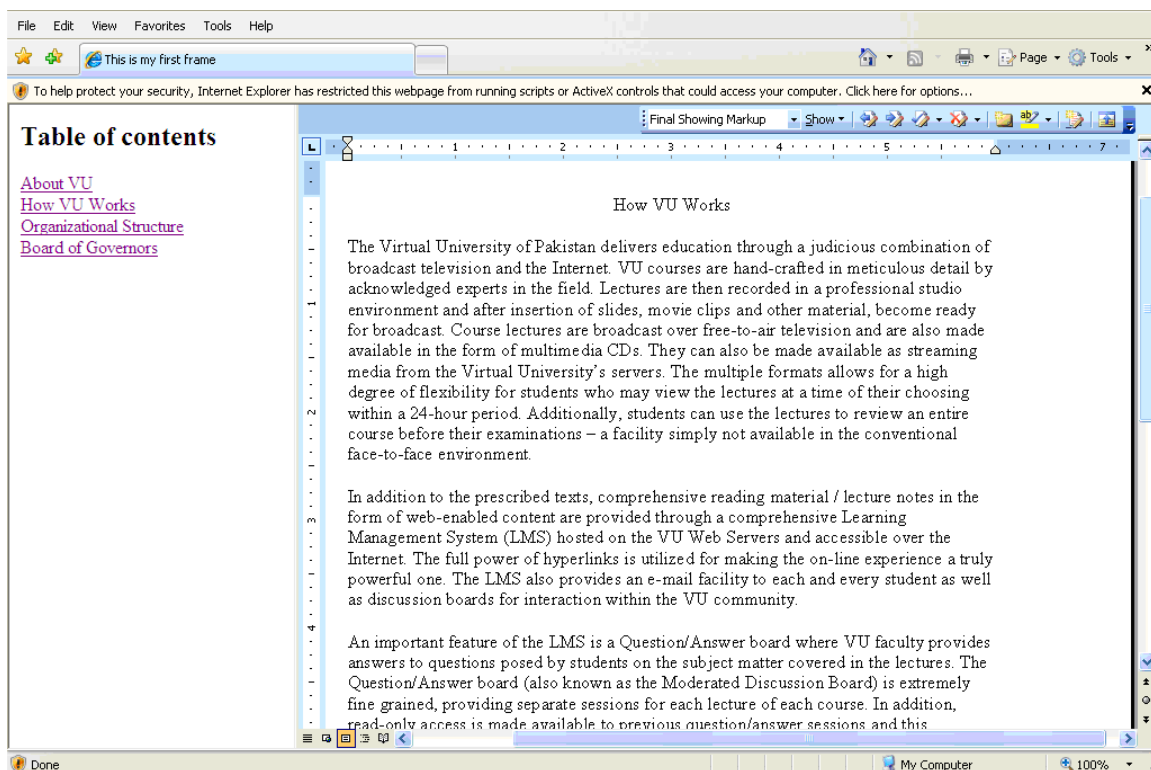

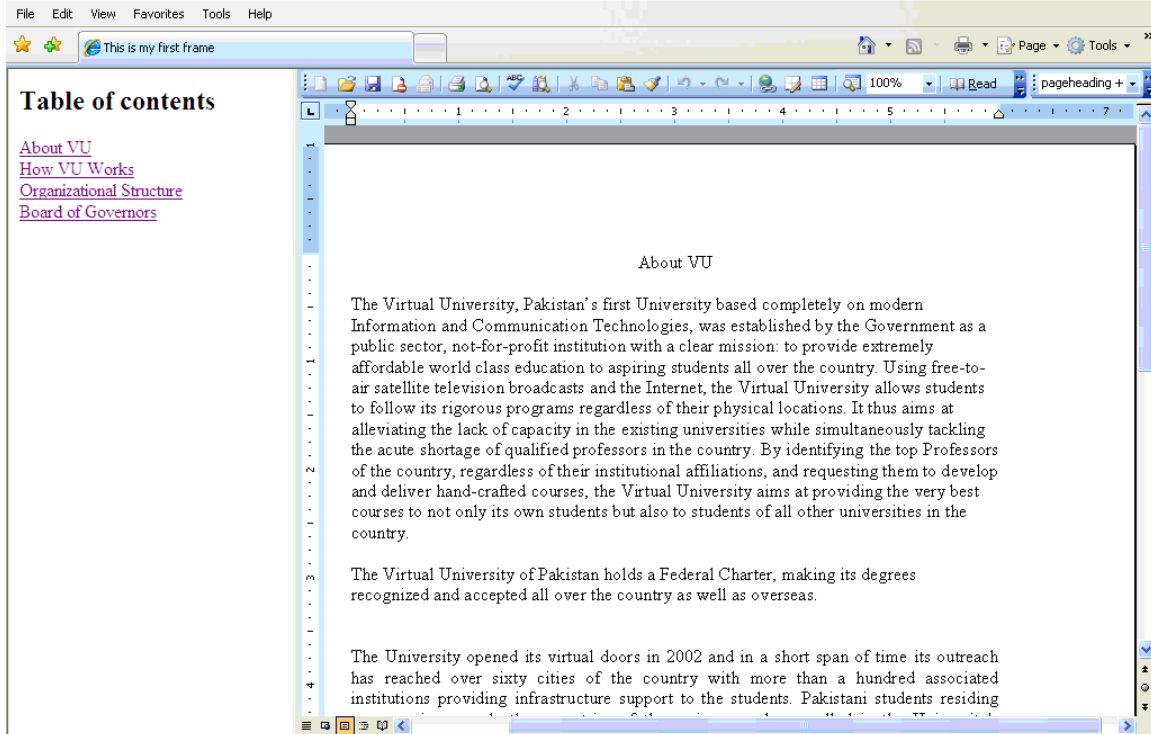

Question:2 (10)

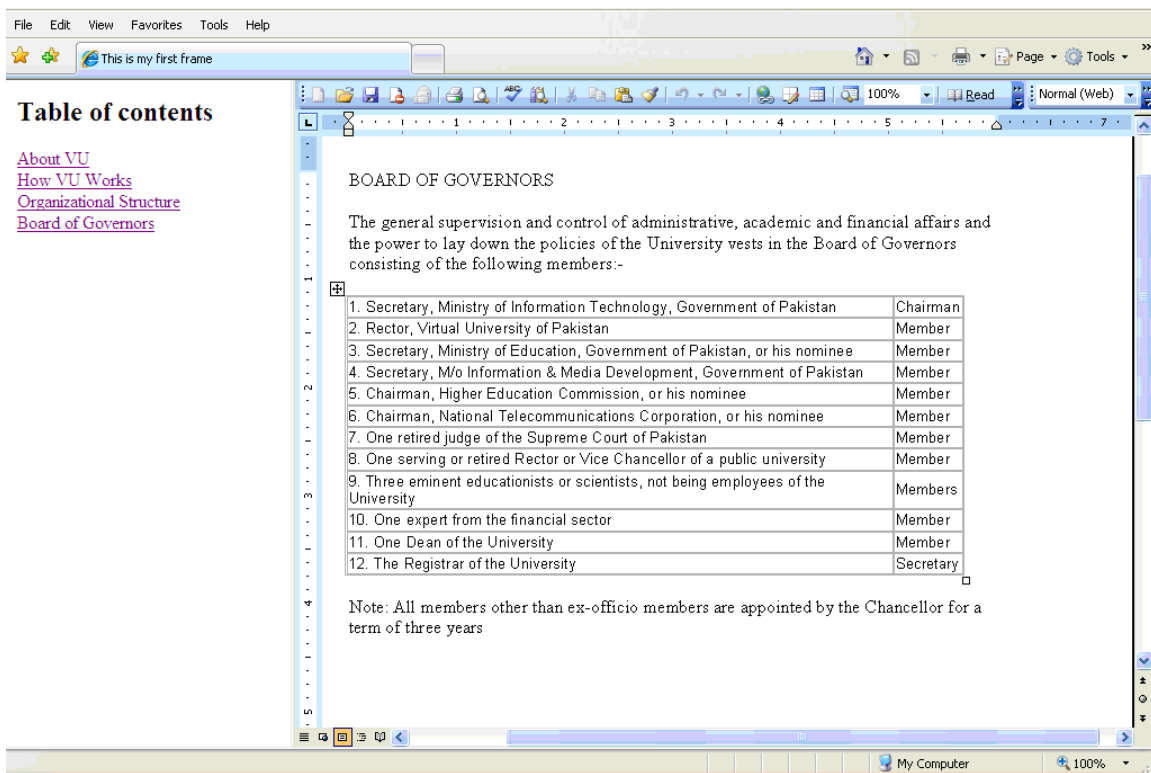

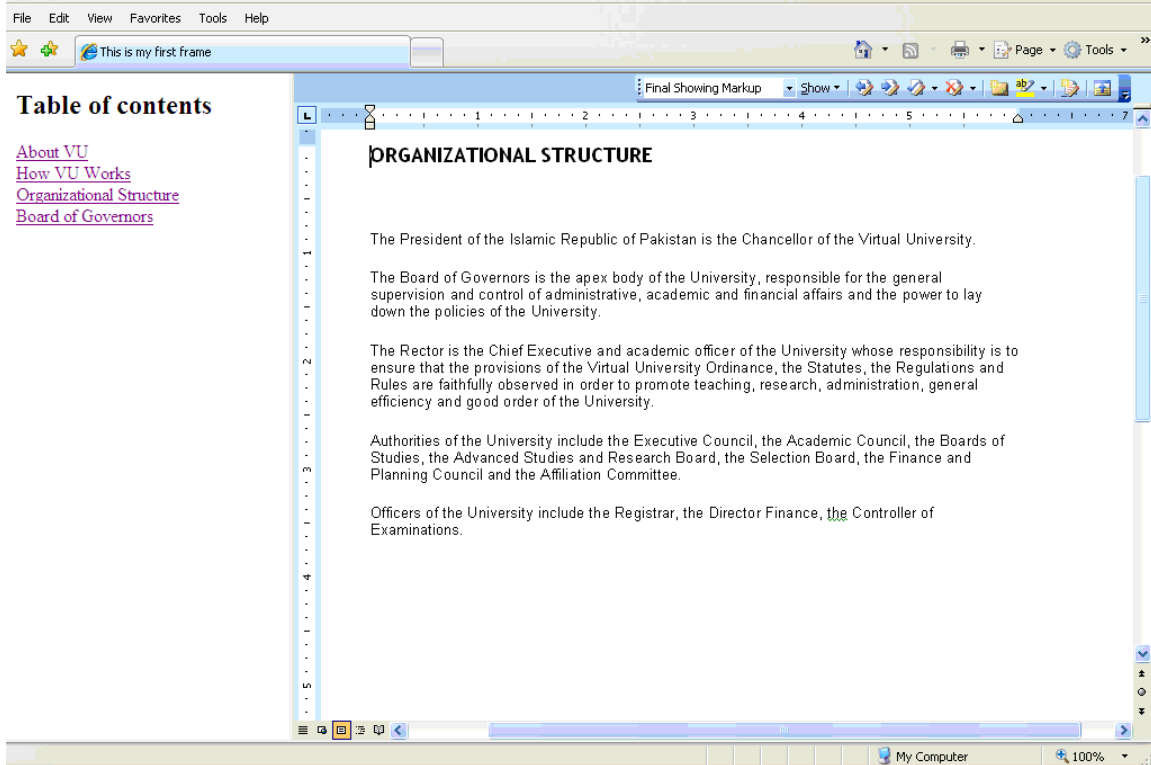

Write an HTML program that divides the webpage in two frames with ratio of 25% and 75%. Assign the first frame to “Table of Contents” and the second frame to “Display area”. Attach another HTML document to the table of contents frame which will contain four hyperlinks named “About VU”, “How VU works”, “Organizational Structure” and “Board of Governors”. Attach four “.doc” files to these links in such a way that when user clicks the link, the target files should open in “Display area”.

***Note:** Do not use any third party tool*

A sample output will look like given below:

Note: Submit “.doc” file only. Write your HTML codes of Question 1 (part b) and Question 2 in a single word file (You do not need to submit different html files). Send email at it430@vu.edu.pk for any assignment related query.

Your work must be original. No marks will be given in case of **cheating or copying from the internet or from any other student.**

Deadline:

Your assignment must be uploaded/submitted on or before 18th April 2011.
